## Storm Data and Unusual Weather Phenomena - June 2014

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
Heavy rain accumulation of 2.50 to 4.00" in two hours resulted in flash flooding of northern Scott County. Streets in the town of Bluffs were flooded, as was Illinois Route 100 from just north of I-72 through Bluffs. In addition, standing water was reported on I-72 near the Scott - Pike County line. Numerous rural roads were impassable in rural northern Scott County. The flooding subsided rapidly around daybreak.				

A large complex of thunderstorms developed along a frontal boundary across Nebraska during the afternoon of June 3rd. These storms then tracked southeastward along the boundary into central Illinois during the late evening of June 3rd into the early morning hours of June 4th. Many of the storms produced damaging wind gusts of around 60 mph and heavy rain. Rainfall amounts were generally on the order of 1 to 2 inches, but some spots across central and eastern Illinois picked up as much as 4 inches.

**PEORIA COUNTY --- 0.5 NNW SOUTHPORT [40.79, -89.90], 1.5 E ALTA [40.82, -89.60], 1.2 W PEORIA HGTS [40.73, -89.59], 1.9 SW MAXWELL [40.66, -89.72], 2.5 SW EDEN [40.65, -89.86]**

06/07/14 20:30 CST	0	Flash Flood (due to Heavy Rain)
06/08/14 02:30 CST	0	Source: Law Enforcement

Persistent thunderstorms produced 2.50 to 4.00 inches of rain in a large part of Peoria County late in the evening of June 7th. This resulted in flash flooding in the western and northern sections of the city of Peoria, as well as rural roads and highways in central Peoria County. Sections of Illinois Route 116 and Route 8 were closed toward Hanna City and Edwards. Roads in the northern suburbs of Peoria, toward Alta and Dunlap were also impassable due to the flooding.

An upper-level disturbance interacting with a warm and humid airmass triggered scattered thunderstorms across west-central Illinois during the late afternoon and evening of June 7th. Some of the slow-moving storms dropped heavy rainfall of 2 to 4 inches across the Peoria area, causing localized flash flooding into the very early morning hours of June 8th.

**MORGAN COUNTY --- 3.4 NNW LYNNVILLE [39.73, -90.37], 0.2 WNW SINCLAIR [39.80, -90.12], 5.9 SE NORTONVILLE [39.52, -90.04], 4.6 SSE MURRAYVILLE [39.52, -90.21], 4.0 SE LYNNVILLE [39.64, -90.30], 3.0 SSE LYNNVILLE [39.64, -90.34], 1.2 SSE LYNNVILLE [39.67, -90.34], 1.5 SW LYNNVILLE [39.67, -90.37]**

06/10/14 19:30 CST	0	Flash Flood (due to Heavy Rain)
06/11/14 00:30 CST	0	Source: Emergency Manager

Several periods of thunderstorms resulted in 2.50 to 5.00 inches of rain and flash flooding in western and central Morgan County. Numerous streets in the city of Jacksonville were flooded and closed. Nearly all rural roads from Jacksonville to Woodson, and west to the Scott County line were impassable. Illinois Route 104 from Jacksonville to Franklin was also closed for several hours.

**SCOTT COUNTY --- 2.6 E MERRITT [39.73, -90.37], 3.9 SE RIGGSTON [39.67, -90.37], 5.4 ESE RIGGSTON [39.67, -90.34], 6.5 SE RIGGSTON [39.64, -90.34], 7.5 NNE MANCHESTER [39.64, -90.30], 2.3 WSW MANCHESTER [39.52, -90.37], 5.6 WSW GLASGOW [39.52, -90.58], 4.0 SW OXVILLE [39.66, -90.62]**

## Storm Data and Unusual Weather Phenomena - June 2014

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
Low pressure tracking from Missouri to the southern Great Lakes brought showers and thunderstorms to central Illinois during the afternoon and evening of June 10th. The most persistent area of precipitation developed over west-central Illinois from Scott County eastward into Morgan County where weather observers reported as much as 3 to 5 inches of rain. As a result, numerous roads were closed due to high water flowing across them.

A large tree was blown down at Liberty Lane and Ferndale in Danville.				
<b>An upper-level disturbance triggered several clusters of thunderstorms across west-central Illinois during the afternoon of June 21st. These cells eventually congealed into a line of storms that produced wind damage and sporadic hail, primarily along and west of the I-55 corridor. The storms gradually weakened as they tracked further eastward, but a few cells were still strong enough to cause tree damage as far east as Vermilion County.</b>				
<b>MASON COUNTY --- 1.8 N MANITO WADDELL ARPT [40.51, -89.78]</b>				

## Storm Data and Unusual Weather Phenomena - June 2014

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	06/22/14 15:30 CST		0	Thunderstorm Wind (EG 52 kt)
	06/22/14 15:35 CST		0	Source: Mesonet

A partially rotten 16-inch diameter tree was blown down onto Manito Road just south of Sky Ranch Road.

Persistent thunderstorms produced several periods of heavy rainfall. Total accumulations of up to 4.00" of rain were common in most of Stark County. Rainfall rates in Toulon were nearly 4.00" per hour between 2000 and 2015 LST. Many rural roads were closed across Stark County, as were parts of Illinois Routes 17, 40 and 93. Additional rainfall late in the evening of June 30th caused roads to remain closed through the early morning hours of July 1st.

**A large complex of severe thunderstorms developed along a stationary frontal boundary across eastern Iowa during the afternoon of June 30th, then tracked eastward along the boundary across north-central Illinois during the evening. These storms produced damaging wind gusts of around 60 mph and locally heavy rainfall along and north of a Canton to Minonk line. Additional strong thunderstorms developed further south in Missouri and pushed into the area during the evening, producing widely scattered wind damage along and west of I-55. Very high rainfall rates led to flash flooding across parts of Marshall and Stark County. The flooding continued into the morning hours of July 1st.**
